Education

Mountain Top University, Ogun State, B.Sc. Computer Science and Mathematics

Sept 2022 - present

Relevant Coursework: Machine Learning, Databases, Computer Networking & Communication, Discrete Math, Data Structures & Algorithms, Computer Architecture & Organisation, System Analysis & Design.

Experience

Backend Engineer Intern - HNG Internship (Finalist) – Remote

January 2025 - March 2025

- Completed a highly competitive 8-week remote internship, finishing as a finalist out of thousands of applicants across Africa
- Built backend modules for Gradific (gradific.com), an AI-powered academic assignment and grading platform, using TypeScript and NestJS
- Contributed to the grading engine, notification system, and other core backend modules in a collaborative, fast-paced team environment

Software Development Lead, MTU STEM Community

- Led technical workshops and mentored 15+ student members on backend development, version control, and collaborative engineering practices.

Projects

Convo

Secure, real-time chat application with advanced room functionality and WebSocket integration

- Architected a microservice-style backend with NestJS, Prisma, and PostgreSQL for session management and event-driven message queuing across concurrent chat rooms
- Built Next.js frontend with WebSocket integration for sub-100ms messaging and JWT-secured API endpoints; supports 200+ concurrent connections
- Designed for high availability with Redis-backed session resilience across concurrent multi-room connections

CourseFlow Backend

Enterprise-grade university course management API

- Built with NestJS, TypeScript, PostgreSQL, and Prisma ORM following clean architecture and repository pattern
- JWT authentication with Passport, role-based access control (student/staff/admin), and DTO validation; course scheduling with conflict detection across 30+ departments
- CSV bulk import/export (500+ records), Kubernetes health probes, and auto-generated Swagger documentation

Skills

Languages: Python, Go, TypeScript, JavaScript, React/Next

Frameworks: Node.js stack (Express, Nest.js), Django, FastAPI

Infrastructure & Cloud: Docker, Amazon Web Services (AWS)

Databases & Other: PostgreSQL, MySQL, MongoDB, Redis
